LESSON 1: EXPLORING LIFE AND THE PROCESS OF SCIENCE

- Distinguish science from unjustified claims and explain how science is iterative.
- Describe elements of research design and how they impact scientific findings/conclusions (e.g. identify strengths and weaknesses in research related to bias, sample size, randomization, experimental control)
- Interpret data and choose best way to communicate data in graphs.
- Formulate a testable hypothesis and design a controlled experiment and explain the necessity of replicates.

NOTE: It is important to pay for your digital delivery access code by the third week of the semester to ensure that you have consistent access to these required course materials (accounts may be deactivated for students who have not paid their digital delivery fees). Receiving your access code does not mean that you've paid your bill; you must navigate to the UNC Student Stores website to pay for your access code sent by digital delivery (invoices will not be sent). Be sure to secure a purchase confirmation from UNC Student Stores to avoid having your account deactivated. **Deadlines will not be extended for students who lose access to the Mastering platform due to unpaid digital delivery bills.** Please know that we have worked with UNC Student Stores and Pearson (book publisher) to keep the costs associated with these required materials as low as possible!

*****SORRY ALL, the recording had no sound! We should have this fixed on Monday! *****

Lesson 1

- L01_Exploring Life and Process of Science.pptx
- Lesson 1_Class Outline_Exploring Life and Process of Science.docx
- Lesson 1_GRQs_Exploring Life and Process of Science.docx
- Lesson 1_Slides_Exploring Life and the Process of Science.pdf
- Lesson 1_Video_Class Meeting

Lesson 1: Before Class

- ☐ **Ensure "Course Introduction" checklist items are complete**
- ☐ **Download GRQ file**
- ☐ **Complete readings**
- ☐ **Submit completed GRQs**
- ☐ **Complete Mastering Biology assignments**

Lesson 1: During Class

- ☐ **Download class outline**
- ☐ **Attend class**
- ☐ **Complete Learning Catalytics in class**

Lesson 1: After Class

- ☐ **Review lecture slides / session video**
- ☐ **Post and/or respond to questions in the class forum**
- ☐ **Attend a peer mentor or review session**
- ☐ **Attend BioCell at the Learning Center**
- ☐ **Review syllabus for approaching due dates**
